| Session 4  
20 min | Science | Work from period 5 | Technology | PDHPE | Work from period 2 | Maths | Work from period 2 | Work from period 2 | Language | Technology |

- The times listed in this schedule are a guide only to the amount of working time a teacher expects students to dedicate to each subject. It will take some students a shorter period of time and others a longer period of time on any particular task.
- Work set on a Friday can be completed at any time over the weekend. Boarding houses will be allocating some time on a Sunday evening but students will most likely need to find additional time during the weekend.
- Additional study sessions are recommended and could be used to (a) catch up on work not completed in class, (b) complete the prep from that night, (c) create study notes for a particular subject, (d) to work on ongoing assessment tasks or (e) revise foreign language, formulas, terminology etc.
